ETHEREAL COMFORT.
ETERNAL STYLE.

COMFORT WITH A CONSCIENCE

Create responsibly with the Plus collection. Lightweight soft flooring with a myriad of advantages, Plus goes the extra mile. Thanks to its circular and light backing ecoBACK PLUS, the collection guarantees comfort from start to finish.

Colourful or minimalistic, Plus' designs – Monos, Artus, Forma & Textura – will certainly add some well-deserved balance to your space. No matter what atmosphere you're aiming for.

DESIGNED TO ENDURE

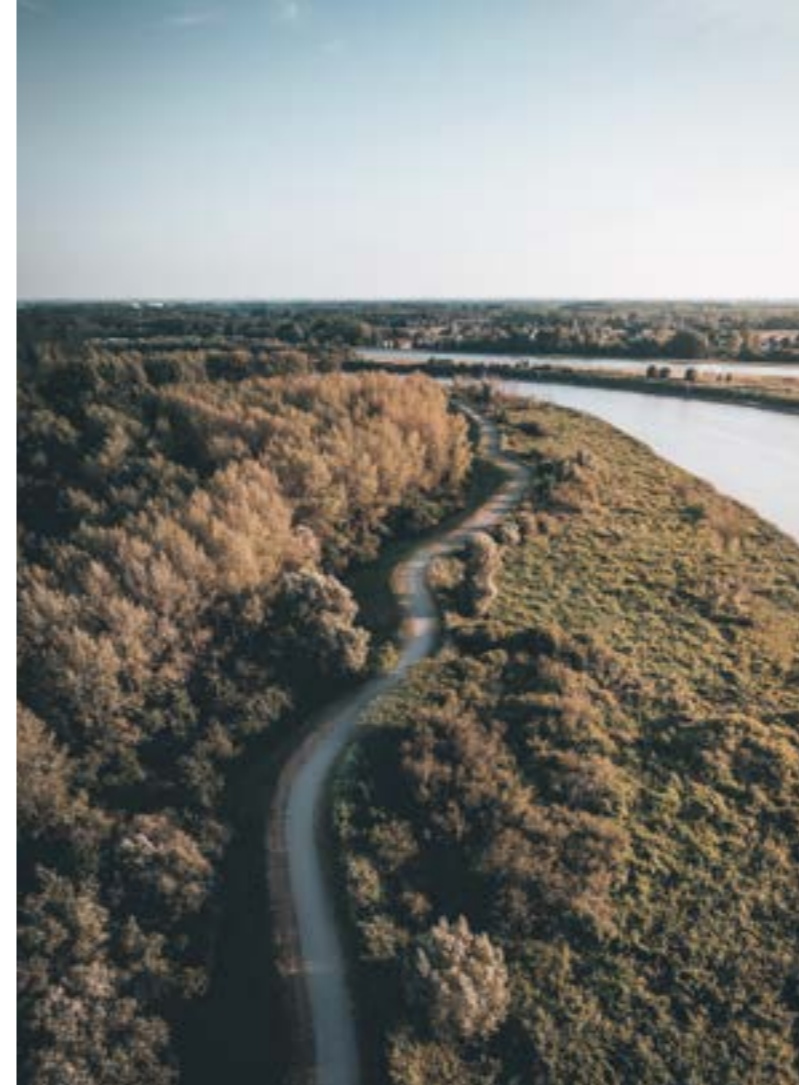

Knowing how colour is an important part of designing a space, Joris Peutz set out to create a collection that features a range of timeless and sophisticated hues while being an eco-friendly solution. Inspired by modern aesthetics and enduring style that have paved the way in interior design, Plus was created.

JORIS PEUTZ

“As a designer I completely understand the importance of the impact of colour choices on our well-being. That’s why Plus includes a wide range of colours that can be used in different spaces all with their particular objective. Neutrals and earthy tones will create an intimate and relax atmosphere while the range of cooler shades are ideal for office spaces enhancing concentration and performance.

Finally I added a selection of dark shades to give a touch of luxury for instance in retail or hotel designs. With a foundation in neuroaesthetics and our mission to create collections with love for our planet, I created Plus. It’s a lightweight soft flooring collection with an on trend yet timeless colour palette and a revolutionary backing ecoBACK PLUS whose production and transport emit lesser CO2 emissions than standard backing solutions.”

Plus comes on our revolutionary ecoBACK PLUS backing. A lightweight backing solution that’s good for both planet and people. This polyolefin and biobased backing contains 85% of recycled and renewed materials. Its lighter weight makes the tile easier to lift during installation and allows for more tiles to be transported at once, causing lower CO2 transport emissions.

LIGHT ON THE EARTH, STRONG IN DESIGN

NEUROAESTHETICALLY PLEASING

Designing spaces should inspire you, but it should also inspire others when it's realised. Your colour choices are more than just a final touch, they shape the atmosphere and emotions of those who occupy the space. Flooring plays a vital role in this, as it's the foundation upon which the entire design rests. Choosing lightly can undermine not only the design but also the feelings and experiences of people within it.

The principles of neuroaesthetics show us how our sensory environment, including flooring, affects our emotions and well-being. Colour, in particular, has a profound impact on how we feel. Warm tones can create a sense of comfort and safety, while cooler hues encourage calmness and focus.

By making thoughtful selections early and with intention, you not only bring your vision to life but also craft meaningful connections that support the emotional health of the space's occupants.

ARTUS 346, FORMA 968

Within the wide range of colours Plus' designs offer, you can find the right hues and textures for the function and the atmosphere of the space. The collection provides a myriad of design choices, whether it's biophilia, maximalism, minimalism, or comfortable softness. Finding the right balance between trendy design and neuroaesthetics starts with Plus.

Make your flooring choices count, they're key to creating spaces that feel as good as they look.

ARTUS 346, FORMA 968

Plus' collections—Monos, Artus, Forma, and Textura—complete your design. From moodboard to realisation, these collections elevate any style or mood you envision.

When simplicity meets sophistication through the artful blending of colours. Monos transforms spaces through its subtle duality, creating environments that are both tranquil and dynamic. The colour palette features a myriad of colours that can be divided into three groups: earthy tones for a warm and cosy feeling, neutral and dark tones for calming yet inspiring atmospheres, and cool and jewel tones for a sophisticated and modern look.

NATURAL DESIGN PLUS N

NATURAL DESIGN

PLUS

N

Artistic freedom in your spatial design calls for Artus. With a textile-patterned look and trendy tones, this collection proves to be the ideal addition to your creative designs. Combined with Forma, an organic pattern that softens the sharpness of modern spaces while highlighting their purpose, you'll create spaces where people can flourish and feel energised. The colour palette of Artus and Forma ranges from warm, vibrant shades, to neutral darker tones for a soft transition to the cooler tones adding an earthy and natural feel to the palette.

TEXTURA 991

Textured simplicity, Textura is a minituft collection with a minimalistic colour palette containing dark neutrals, warm and cool greys and cosy beiges. A collection that adds a sense of calm and modernity to your spatial design.
