Our new supercourt

# About

**25 YEARS**  
SPREADING PADEL WORLDWIDE

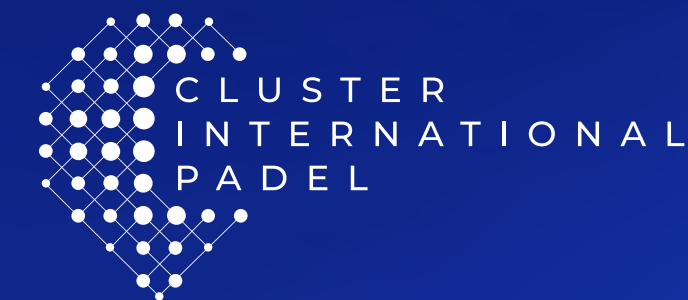

## THE PADEL PIONEER

We are a Spanish-owned family business that continuously strives for perfection with its solid growth and constant focus on innovation, high-quality standards and complete customer satisfaction.

From the initial contact to the project completion, JUBO Padel supports its customers throughout the whole process and offers fast and professional after sales customer support.

FUNDATIONAL MEMBER:

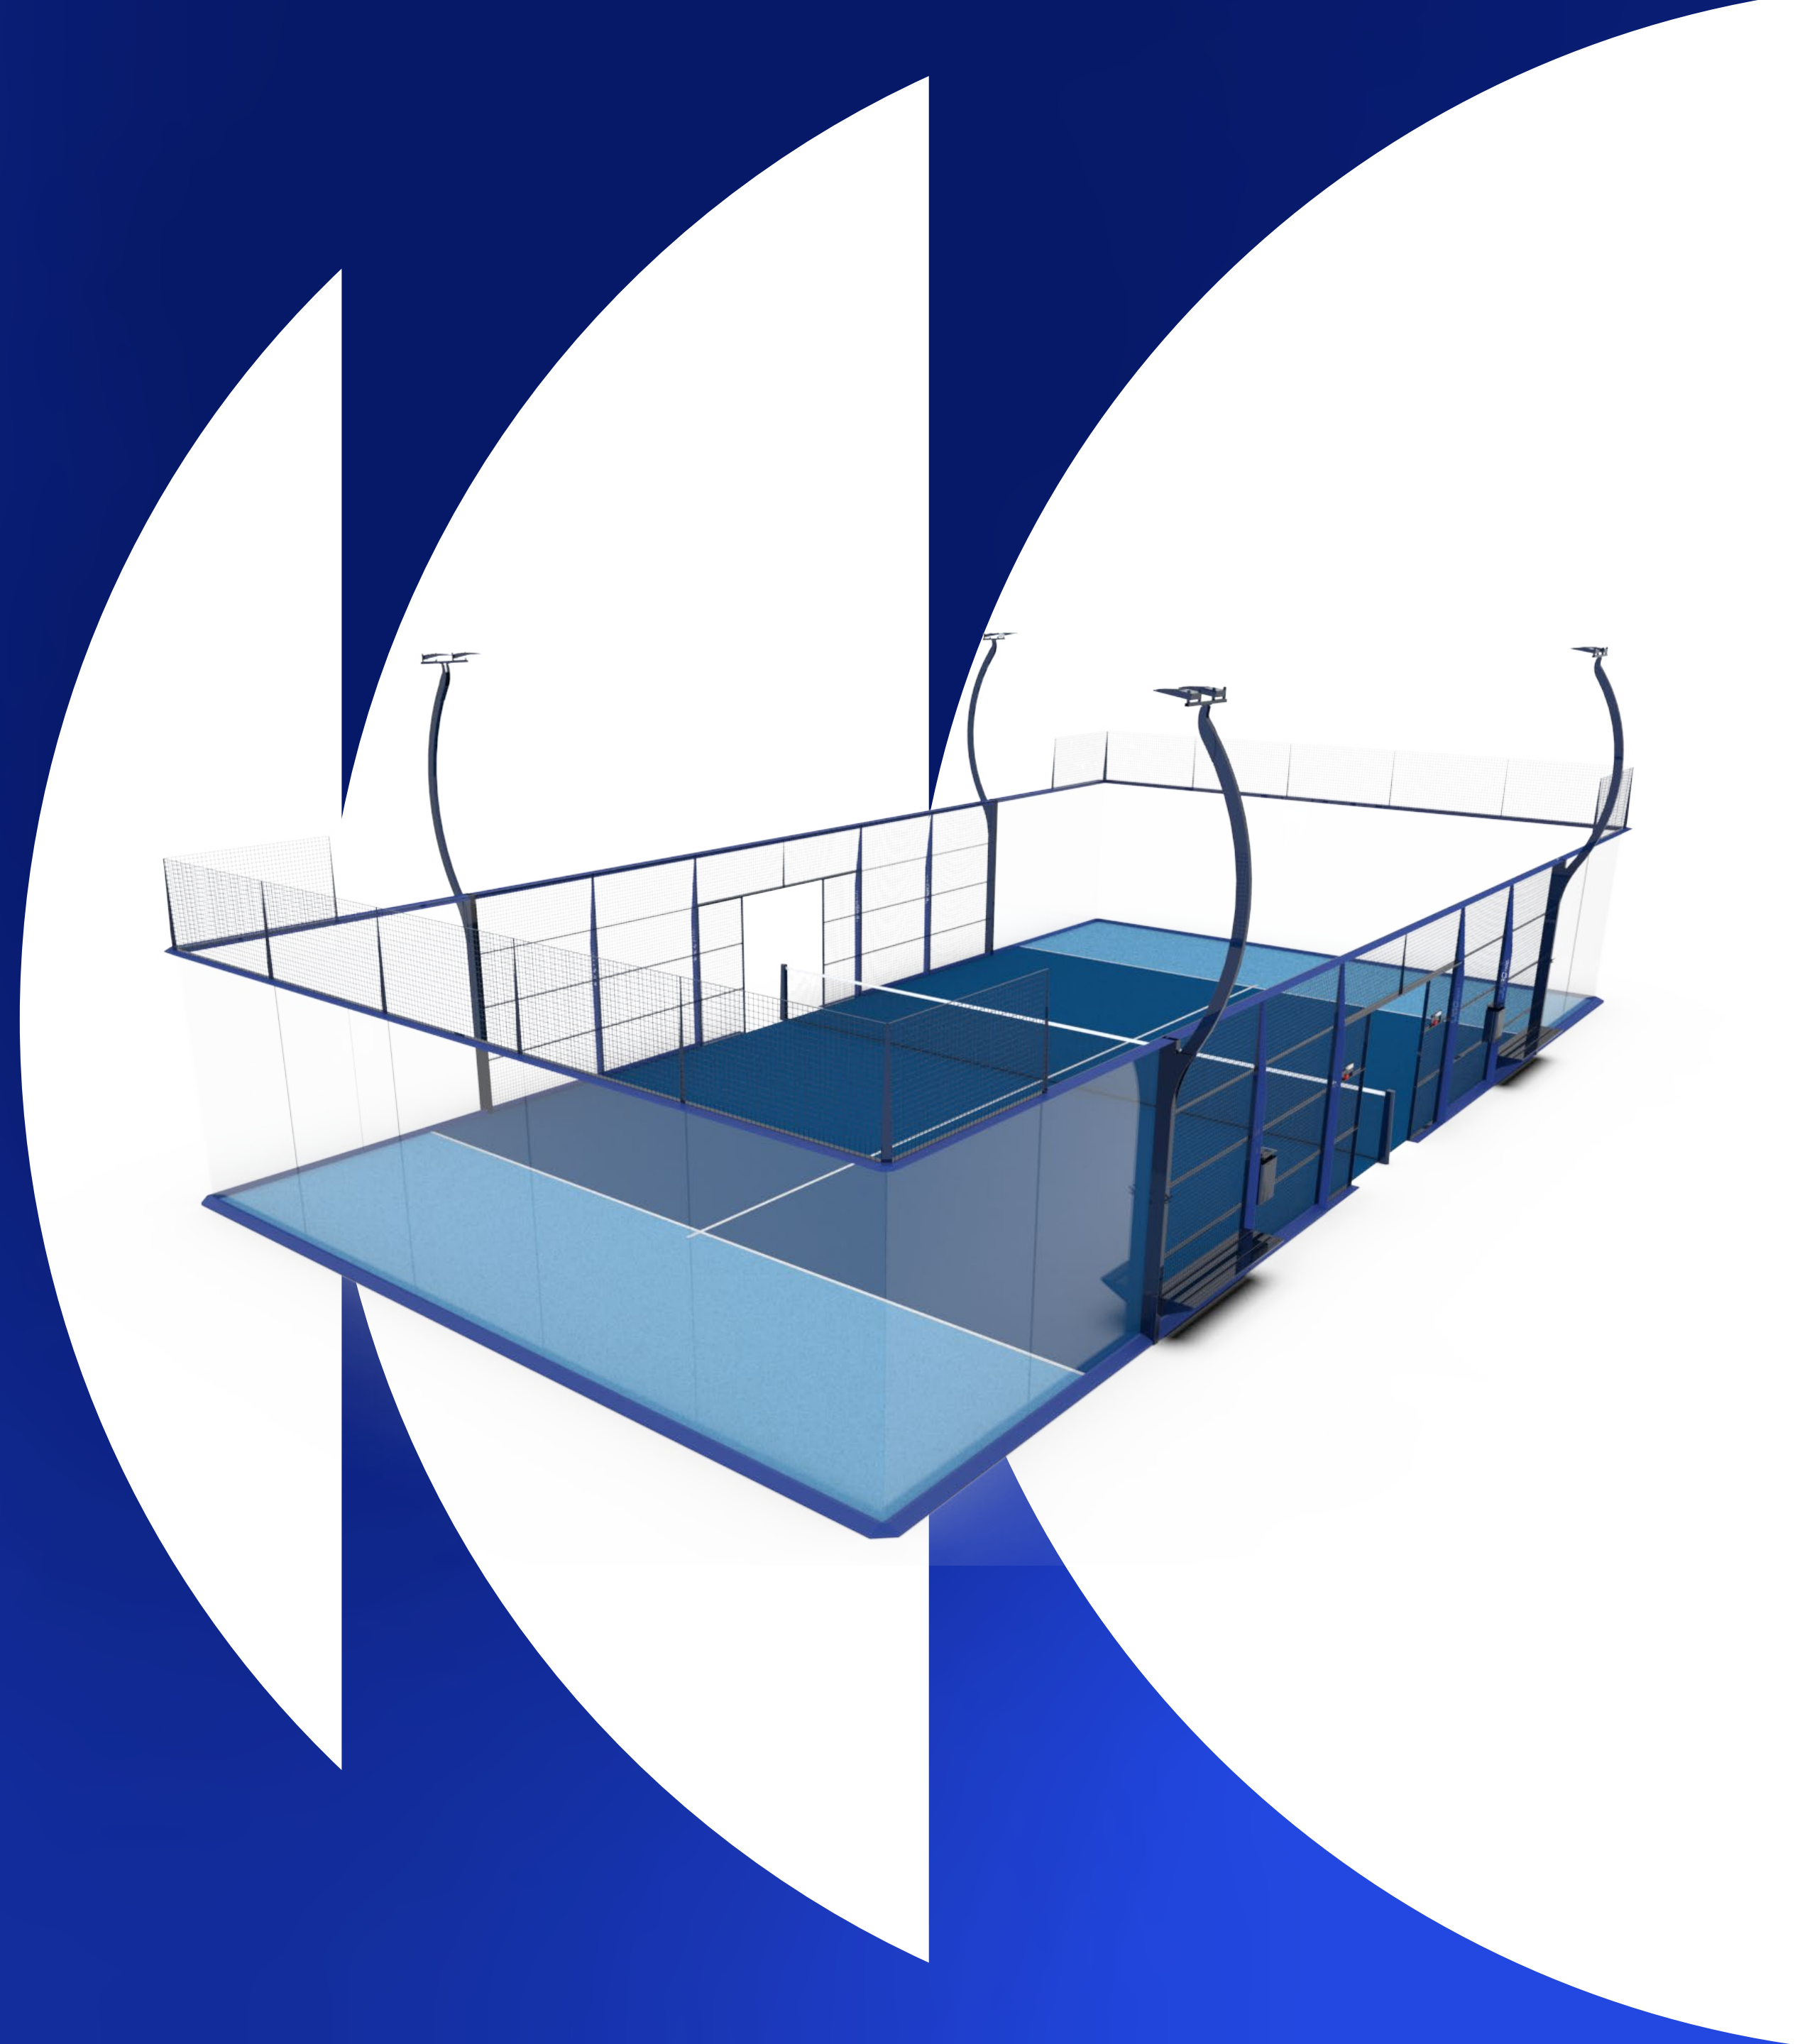

# Our new supercourt

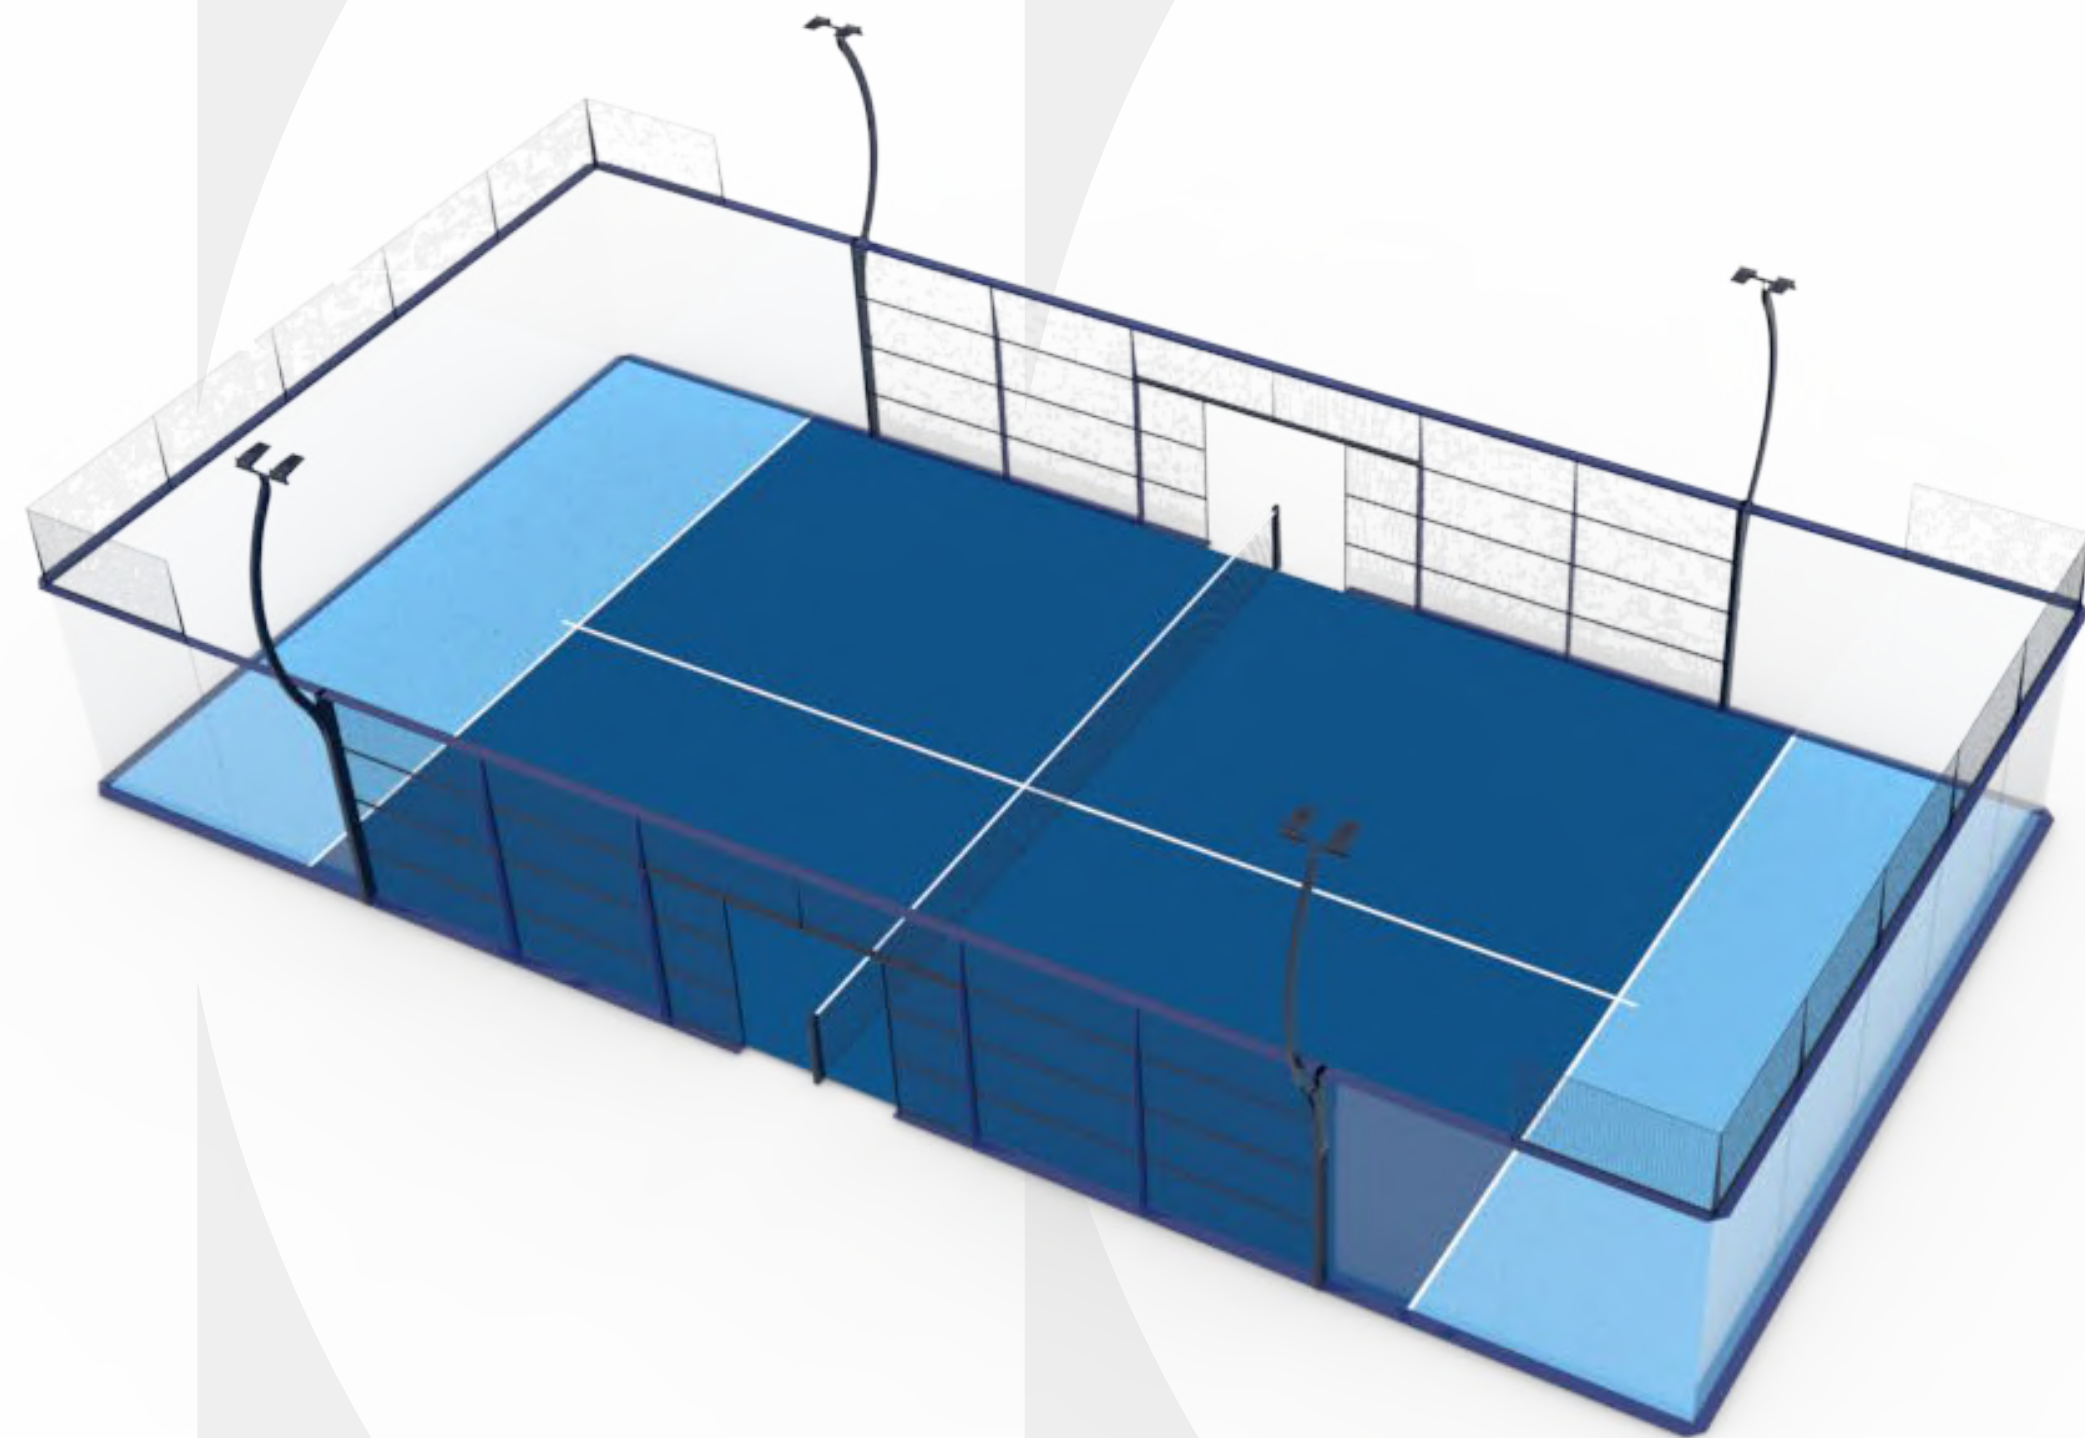

## KNOW MORE ABOUT IT'S TECHNICAL SPECIFICATIONS

This innovative and fully immersive court is the result of the joint work with recognised eminences from the Polytechnic University of Valencia, an internationally prestigious engineering studio, the Diagonal Padel Academy and our experience of more than 25 years manufacturing padel courts, designed not only for professional players, but also to bring the best court to the whole world.

Highly customizable

# Designed to improve

Our patented INFINITY court complies with the regulations of the International Padel Federation and with the most restrictive requirements established by the Eurocodes, reducing costs in manufacturing, transport and assembly, thereby inducing a lower carbon footprint.

The INFINITY structure applies great advances in engineering, optimizing the manufacturing process, completely robotized without welding, maximizing resistance to oxidation, which together with the use of top quality materials, we manage to manufacture the most resistant and durable padel courts.

# Elite players collaboration

AGUSTÍN GÓMEZ SILINGO & MARTA MARRERO

We work together with two outstanding padel players. One of the players with the longest and most successful careers in WPT history, Agustin Gomez Silingo, was a key member of the team that developed our Infinity court.

His expertise has been essential in providing us with professional player feedback, enabling us to create the best court on the padel market.

For the past twelve years, Marta Marrero has been regarded as one of the top padel players in the world. She won 25 professional championships and was ranked first in the world in 2016 and 2019 before temporarily retiring from the World Padel Tour. She currently owns five Aerial clubs in Catalonia, each with its own padel academy where anyone can enjoy playing in our Infinity court.

We are proud to collaborate and share the passion for padel with these two great professionals.

Patented glass system

That allows 3D levelling

## Patented structural system

Panoramic walls supported by a triangular profile (150x70mm) along the 60 perimetral meters of the structure, with a patented structural system designed to obtain the maximum resistance required by the Eurocode.

## Patented anchor plates system

That anchors and levels the metallic structure, as well as supports the glasses. 10mm thick plates between 134 and 160mm width along the 60 perimetral meters of the structure, uniformizing the distribution of loads in a much larger area achieving a much more stable game and resistance, working all together as a block. The complete INFINITY structure is anchored to the ground with a total of 182 screw-bolts.

# Structure

---

Patented structural system  
Meets Eurocodes standards

## S355 carbon steel

All the metal used to produce the metallic structure is carbon steel S355 full galvanized without using welds, & the mesh frames are manufactured with Magnelis® steel.

## Support of the structure

Four 160x80x3mm pillars & eight 8mm thick buttress-plates (customizable) are the central support of the structure, designed to distribute both the load and the stress of the complete structure.

## A4 stainless steel screws

& the screwbolts are certified and homologated by the EU

## Certified paint

Qualisteelcoat® C4H and C5VH (ISO 12944)

Meets Eurocodes standards

## Patented thick frames

5mm thick Magnelis® steel frames (54 pieces) with inner 50x50x4mm electrowelded wire mesh. Designed as an anti-injury system that at the same time provides an unbeatable aesthetic finish, guarantees the continuity of the homogeneous mesh with the other frames, and maximizes the longterm resistance against deformations caused by blows.

Customization

### Net posts matching the structure

Rounded shape without corners, with an internal tensioning system accessible with a hinged lid and hidden anchor plate to avoid injuries.

### WPT type open entrances

2 large open entrances in the centre of the court to facilitate players' quick and safe access and exit.

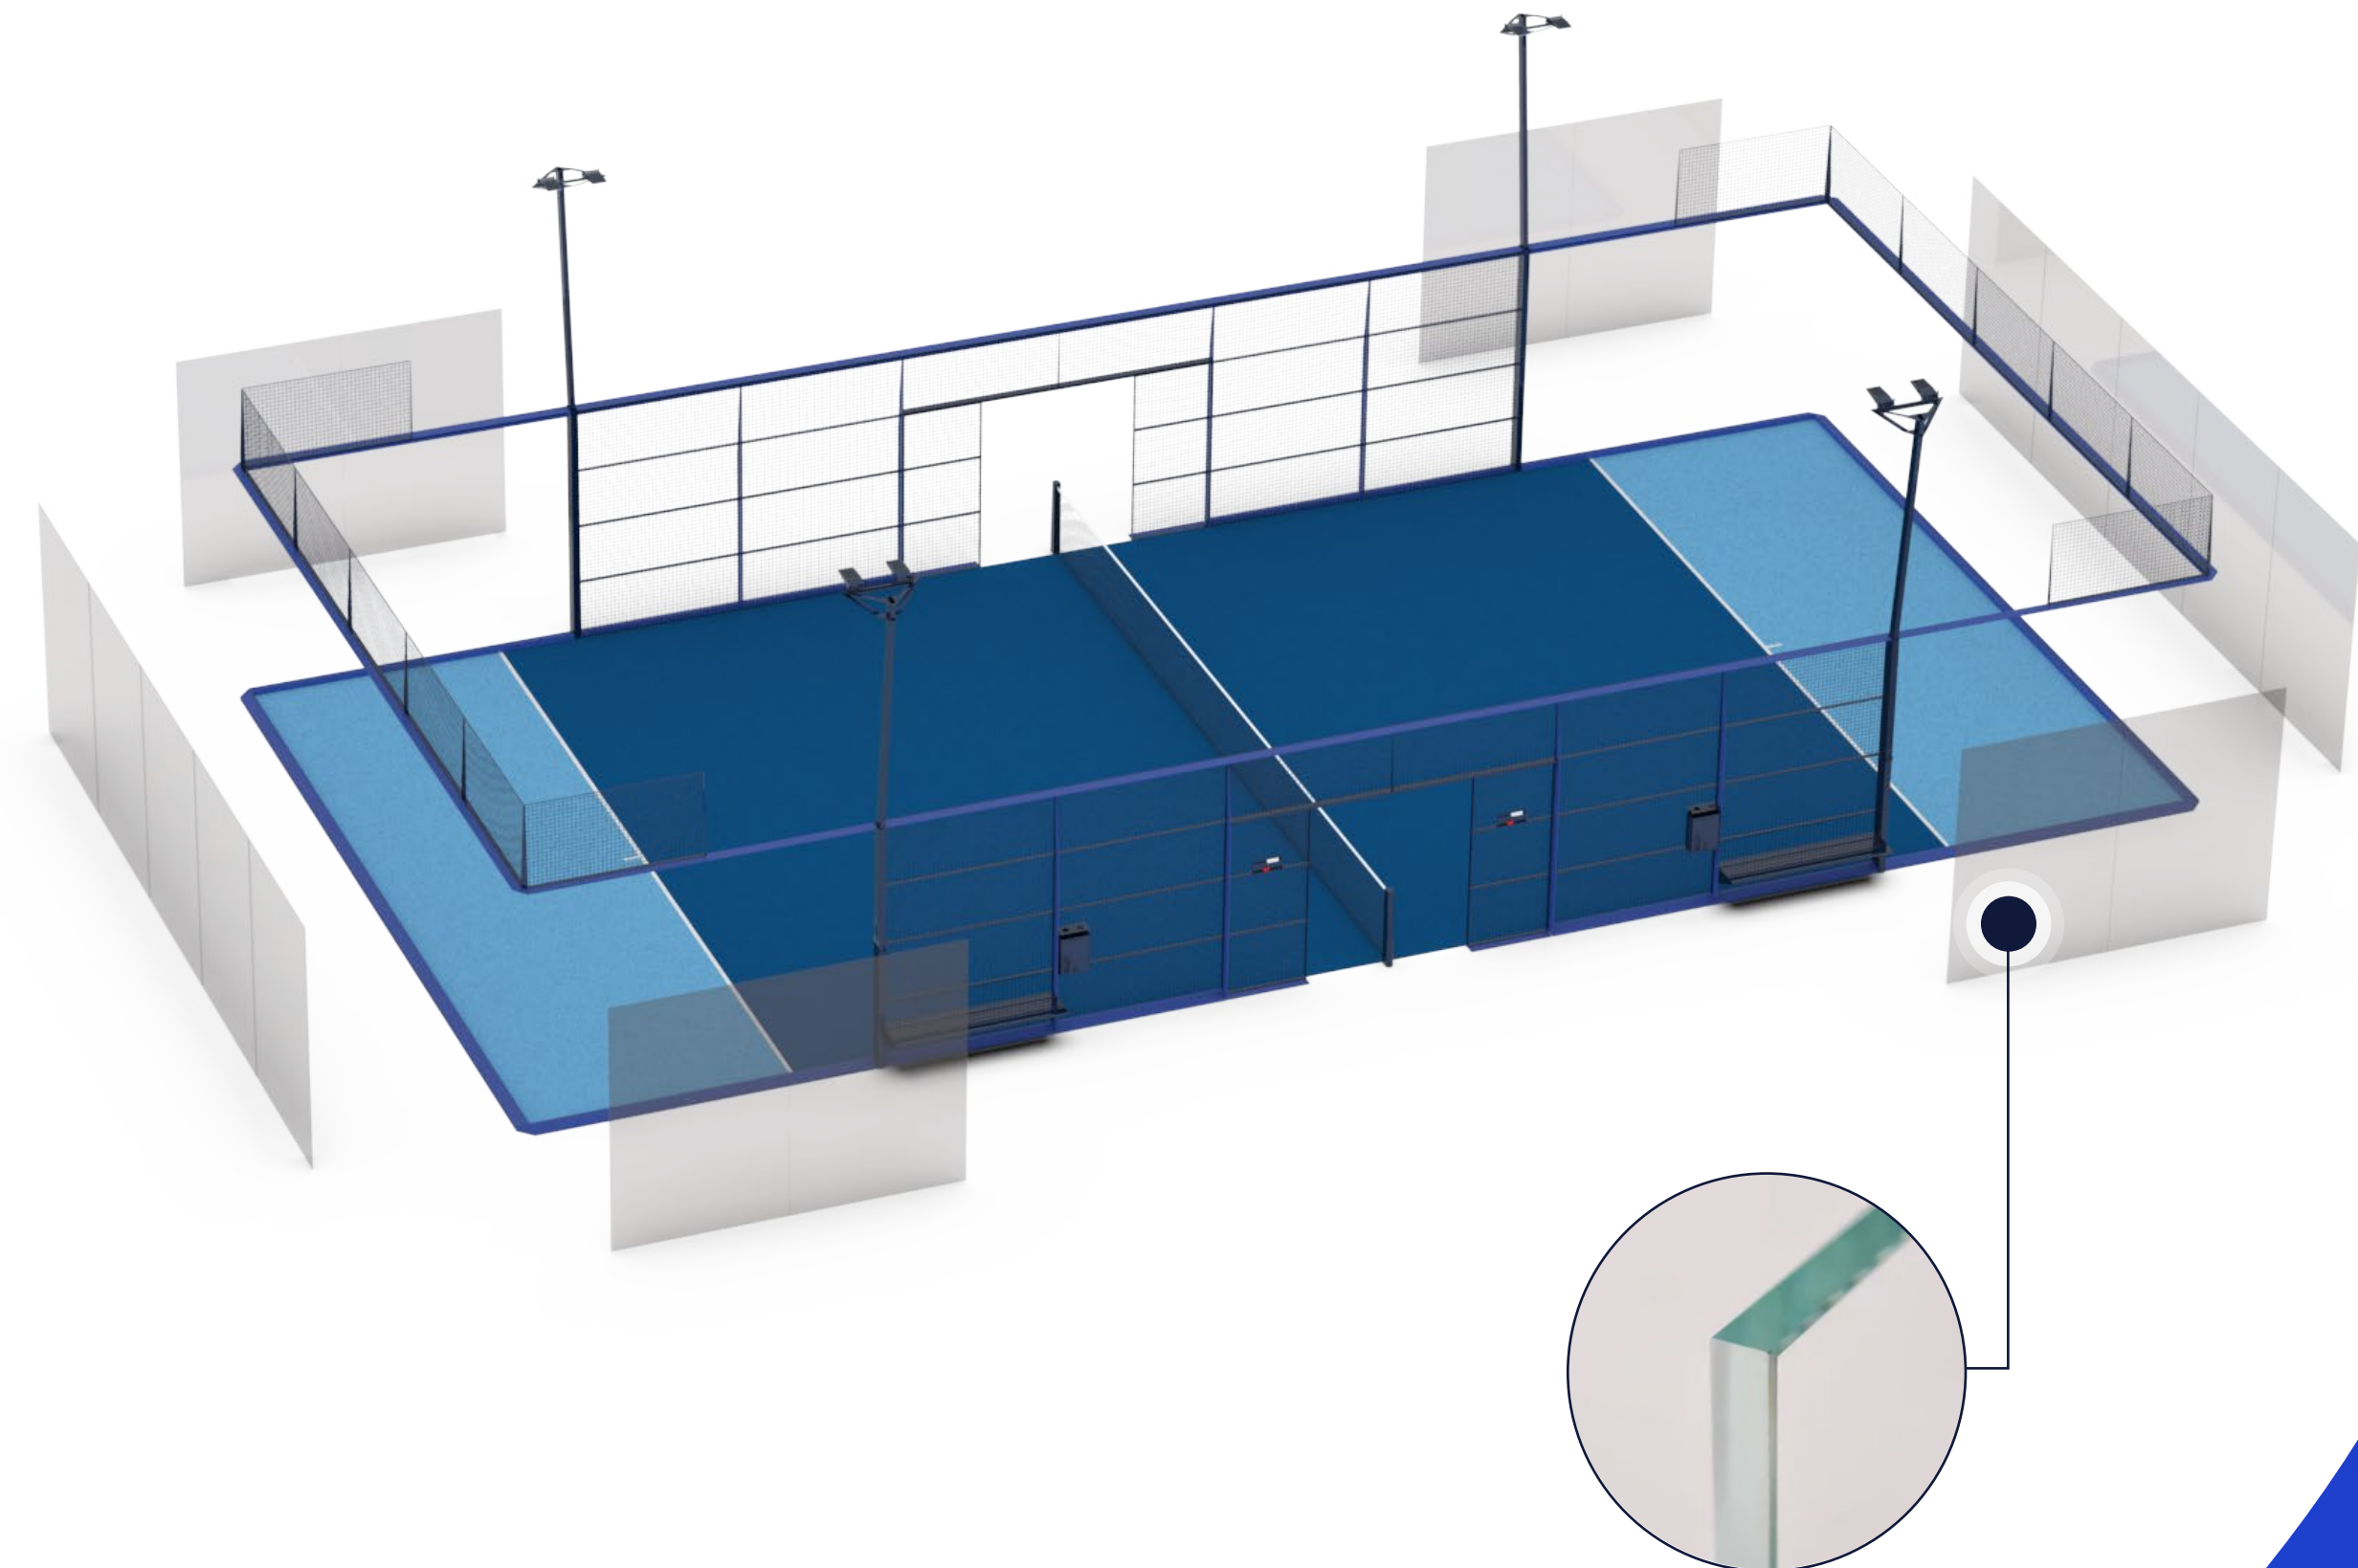

# Tempered Glass

— EN 12150

According to the standards of the International Padel Federation for tempered glass, 12 mm thick with flat polished edge, with perfect planimetry and fully homologated according with the WPT, Premier Padel and APT designs: 18 glasses of 2995 x 1995 mm, with countersunk holes (108 m<sup>2</sup>).

Rubber joints of the highest quality, with the same thickness as the metal section, to absorb shock and vibration of the glass against the metal structure.

Anchoring of tempered glass with M10 countersunk screws A4 stainless steel.

# Choose the structural system you need

Depending on the weather conditions to which the padel court is subjected, or if it needs to be a fixed or temporary installation, but always enjoy the same performance, maintaining maximum elegance and the best design, regardless of whether you play indoors or on the roof of a skyscraper

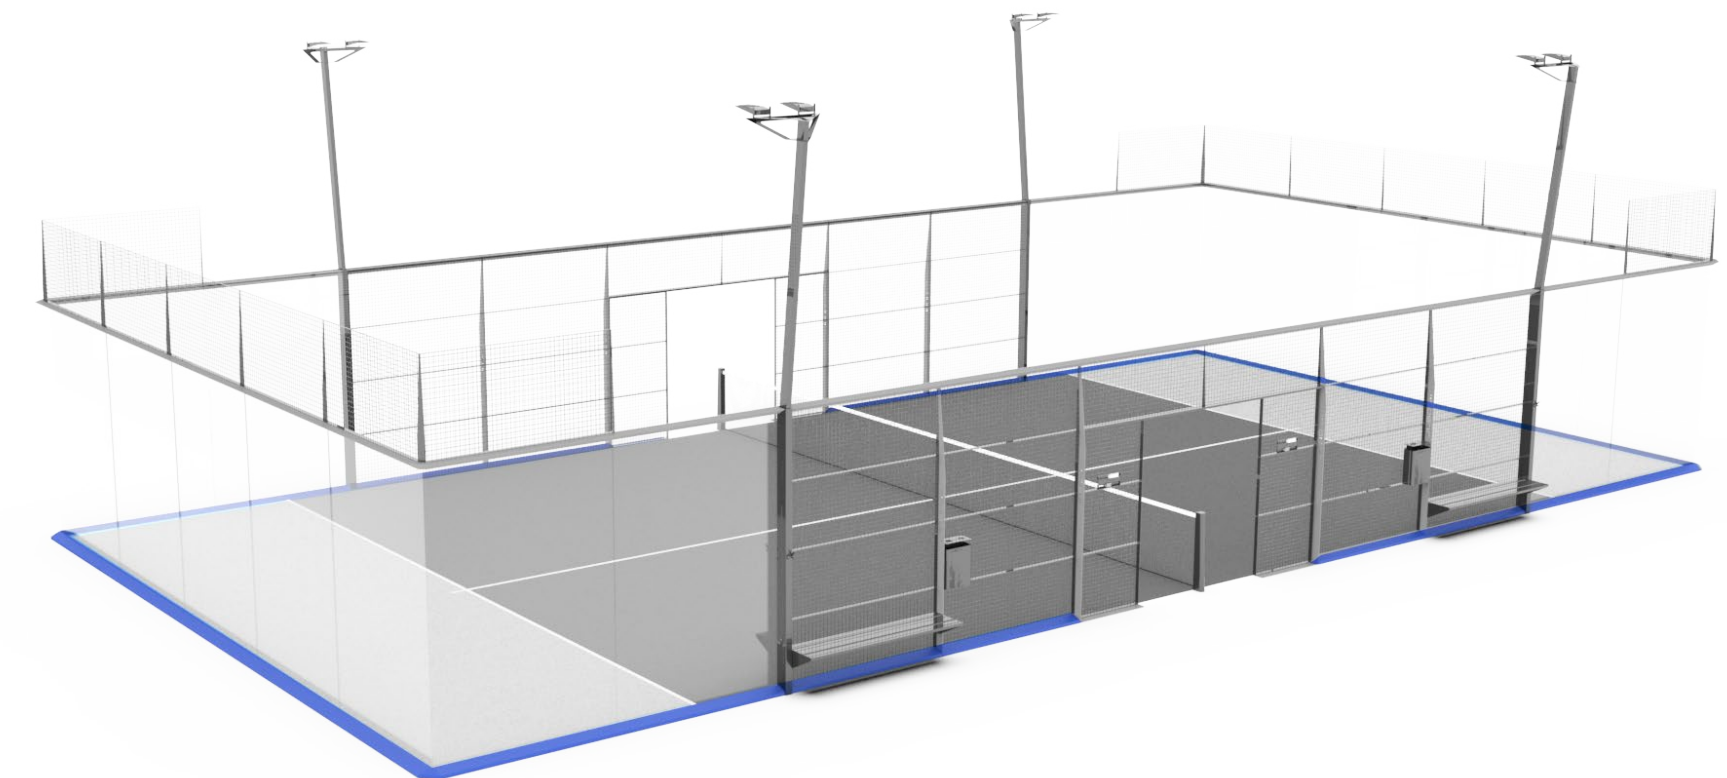

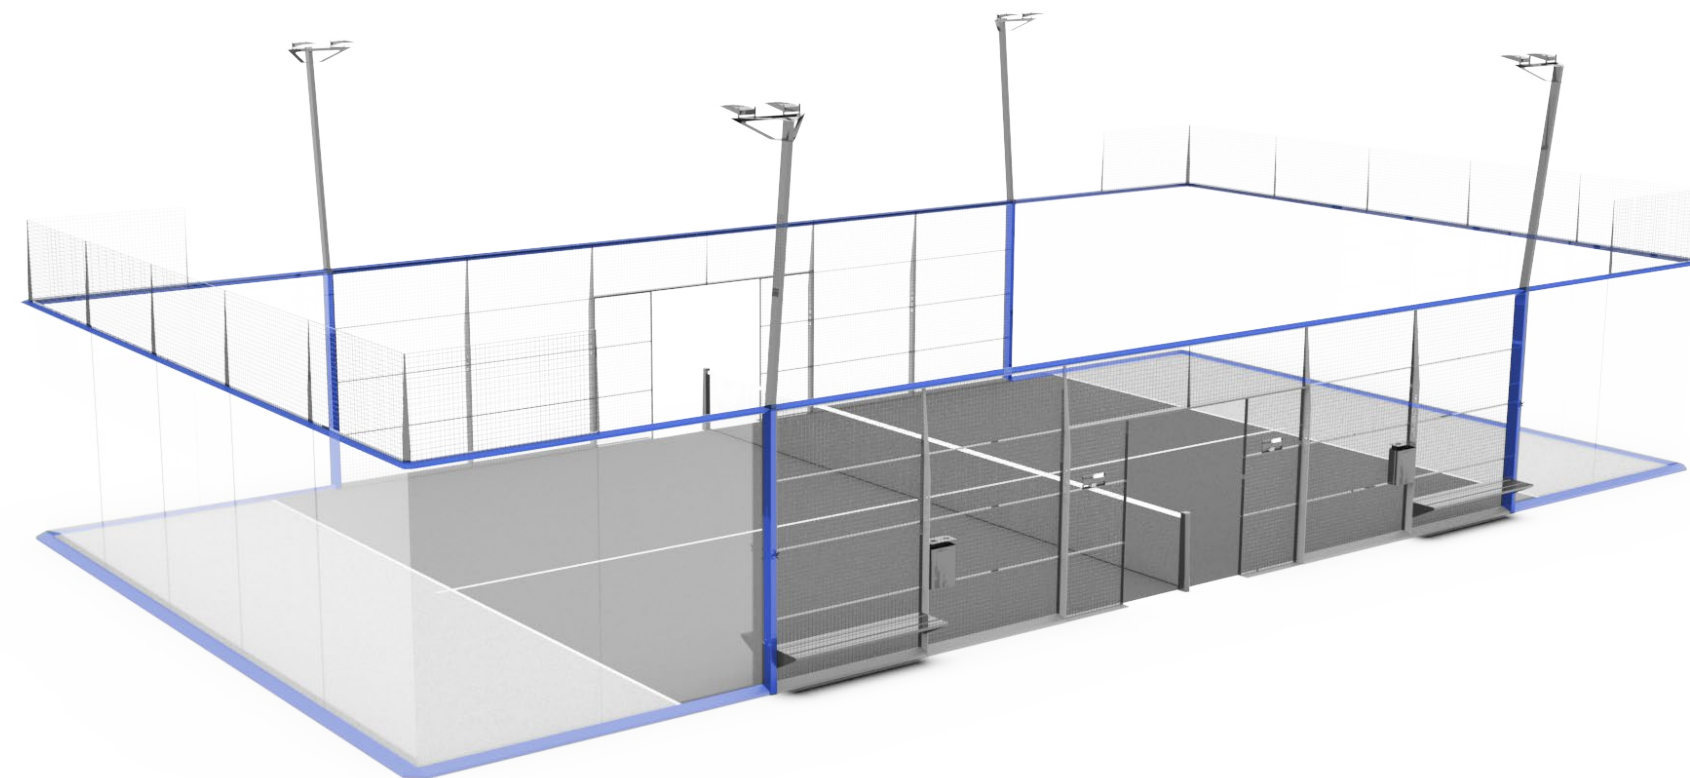

Design

Structure

Glass

Versions

Customization

## infinity

Solidity and resistance to be able to withstand normal weather conditions. Patented structural system designed to obtain the best game performance, at all levels and intensively. The recommended option for most facilities, padel clubs, hotels and private homes.

## infinity MAX

Same performance as Infinity, but structure is resized to provide the greatest solidity, robustness and resistance, making it able to withstand the most extreme weather conditions and comply with the toughest Eurocode requirements.

## infinity POP-UP

Designed to be able to assemble and disassemble the court without losing quality and playability. With portable kit to avoid anchoring to the ground. Suitable for temporary or fixed installations, it's the an ideal option for events.

# All you need, we can do it

Customize your padel court according to your needs, fully customizable in colors, branding, lighting, protections and complementary accessories.

PRIMARY OPTION

Game lines in white in the same material, joint tape, special adhesives, as well as supply and extension of silica sand of selected granulometry with rounded edges, in a total of 10 kg/m<sup>2</sup> for **MONDO XN SUPERCOURT** and **PRO TURF 240**.

# Turf model

PRIMARY OPTION

**MONDO XN SUPERCOURT** (Official Turf of World Padel Tour) top quality monofilament in green, red or blue colour. Turf made from STX and XNOVA, both polyethylene fibre, texturized (curly) monofilaments, 10 mm height and 250 / 160 µm thick. 6 monofilament fibres inserted per knot and 46.200 knots per m<sup>2</sup> (total: 554.400 filaments per m<sup>2</sup>). 10.000 Dtex turf with a total fibre weight of 1.393 g/m<sup>2</sup>. Support base finished in polyurethane to ensure better long-term finish, with a total product weight of 2.208g/m<sup>2</sup>.

SECONDARY OPTION

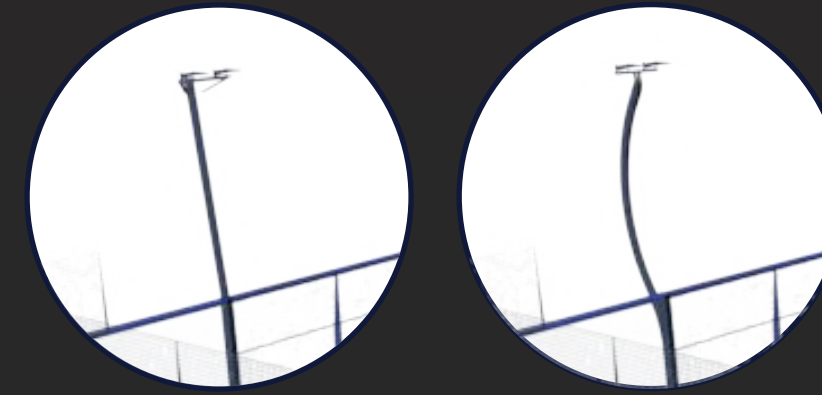

**PRO TURF 240** top quality monofilament in blue, green, clay, red, pink or black colour. Turf made from polyethylene fibre, texturized (curly) monofilaments, 10 mm height and 170 µm thick. 6 monofilament fibres inserted per knot and 50.394 knots per m<sup>2</sup> (total: 806.304 filaments per m<sup>2</sup>). 8.800 Dtex turf with a total fibre weight of 1.353 g/m<sup>2</sup>. Backing made with a dual layer woven polypropylene with fibre-locked fleece and latex, with a total product weight of 2.504/m<sup>2</sup>.

# Efficient lighting

We use LED ultra slim floodlights, 150W or 200W of power with high luminosity, high efficiency heatsink, and highquality driver. (EN 12193).

## Lighting & illumination

Choose the shape of the pillars and the number and power of the LED floodlights for personal, commercial or tournament use.

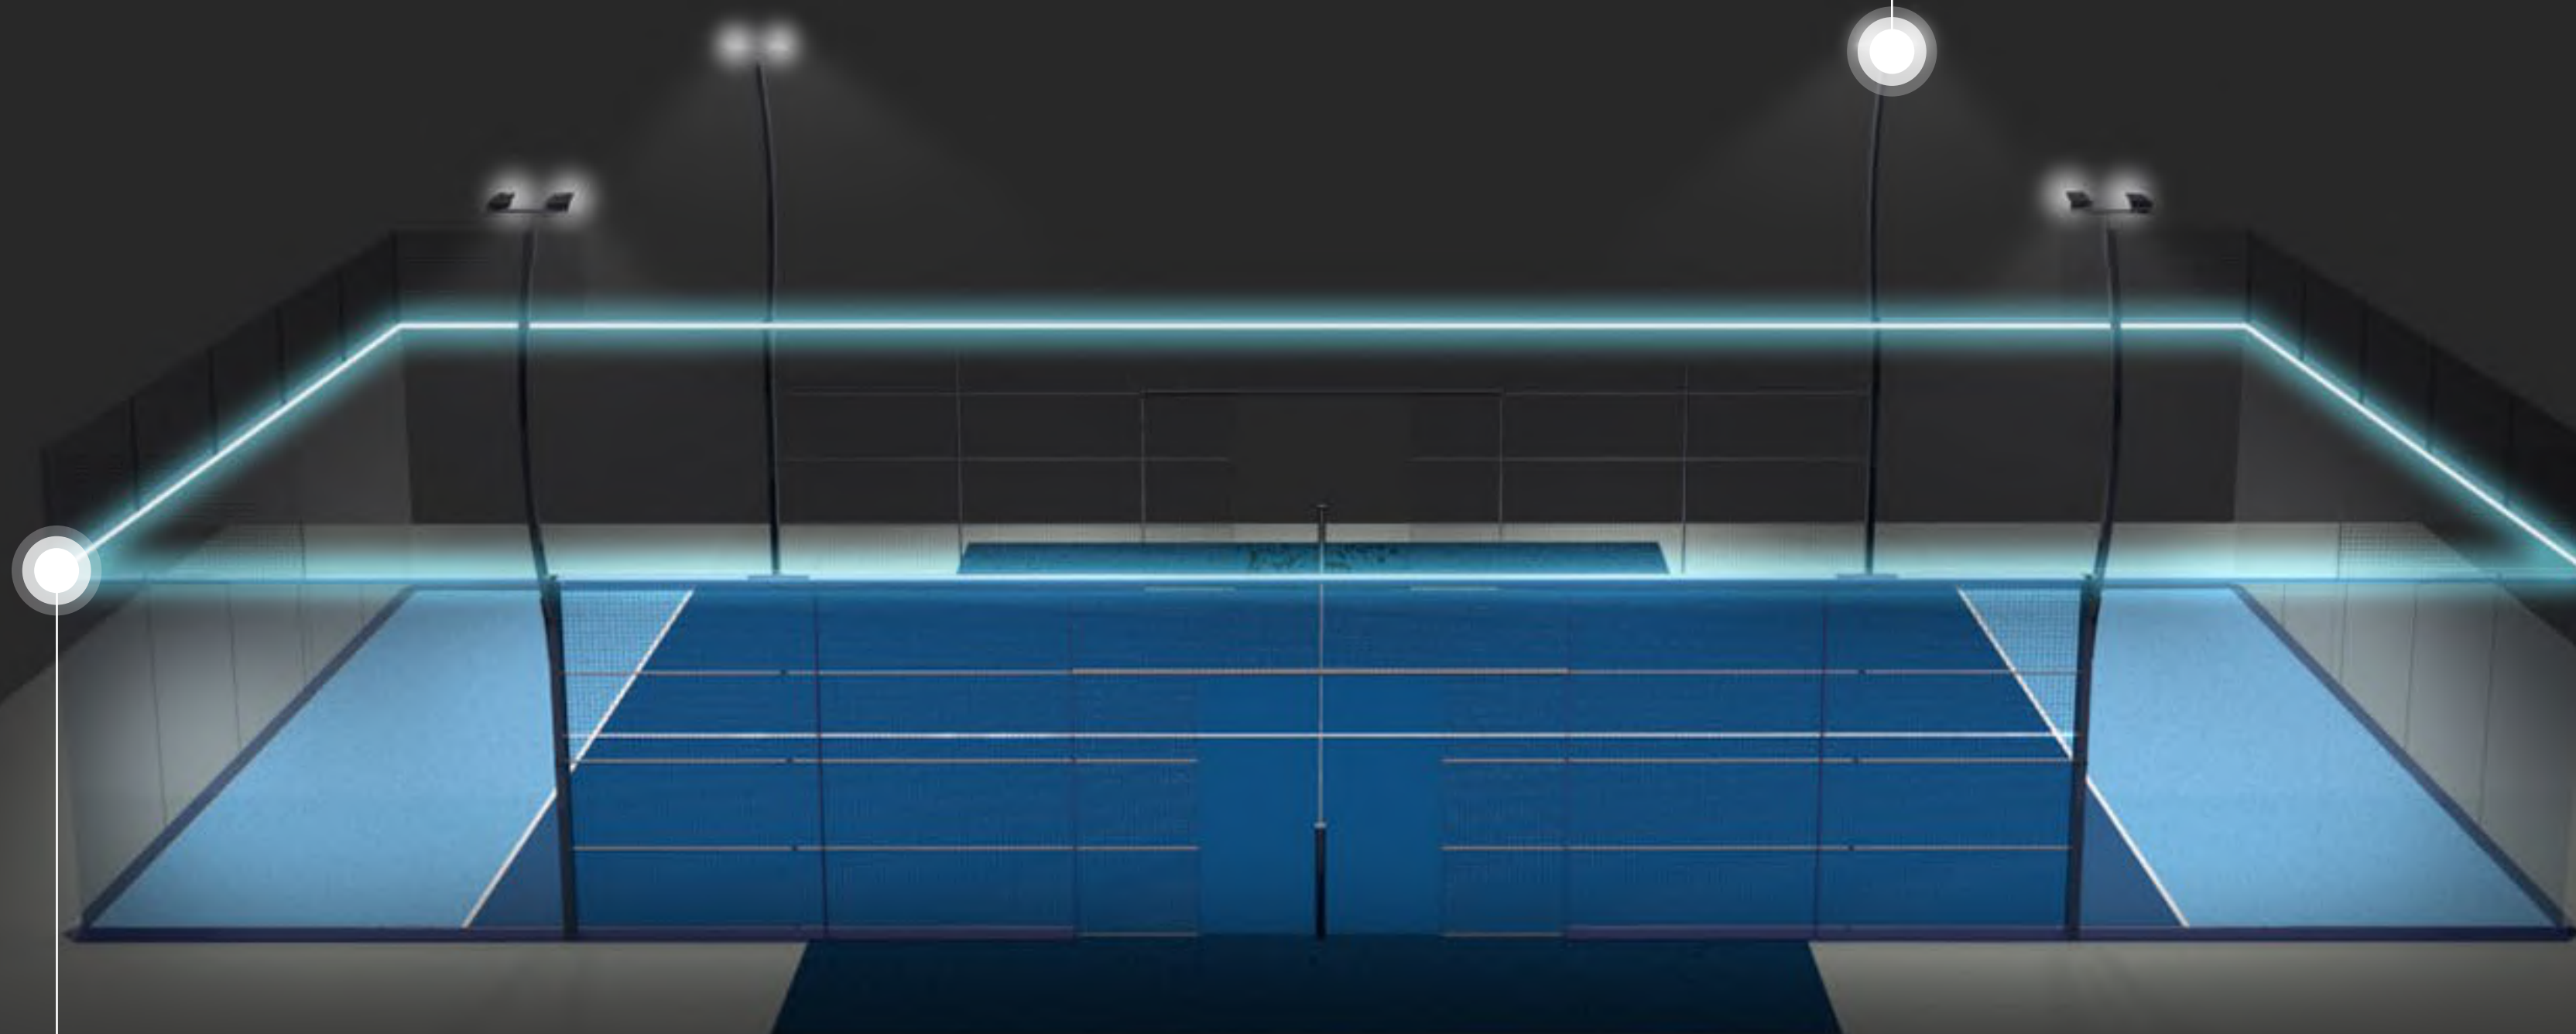

Design
